

Department of Computer Technology

Vision Statement of the Department.

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission Statement of the Department.

To nurture computer engineering professionals by offering Dynamic learning environment that encourages problem-solving using emerging technology, National Education Policy aligned evidence-based technical education, fostering ,innovation, research, and industry–institute collaboration & Holistic, ethical and sustainable development for lifelong success.

Session 2026-2027

Vision: Dream of where you want.	Mission: Means to achieve Vision
---	---

Program Educational Objectives of the program (PEO): (broad statements that describe the professional and career accomplishments)

PEO1	Preparation	P: Preparation	Pep-CL abbreviation pronounce as Pep-si-IL easy to recall
PEO2	Core Competence	E: Environment (Learning Environment)	
PEO3	Breadth	P: Professionalism	
PEO4	Professionalism	C: Core Competence	
PEO5	Learning Environment	L: Breadth (Learning in diverse areas)	

Program Outcomes (PO): (statements that describe what a student should be able to do and know by the end of a program)

Keywords of POs:

Engineering knowledge, Problem analysis, Design/development of solutions, Conduct Investigations of Complex Problems, Engineering Tool Usage, The Engineer and The World, Ethics, Individual and Collaborative Team work, Communication, Project Management and Finance, Life-Long Learning

PSO Keywords: Cutting edge technologies, Research

“I am an engineer, and I know how to apply engineering knowledge to investigate, analyse and design solutions to complex problems using tools for entire world following all ethics in a collaborative way with proper management skills throughout my life.” to contribute to the development of cutting-edge technologies and Research.

Integrity: I will adhere to the Laboratory Code of Conduct and ethics in its entirety.

Name and Signature of Student and Date

(Signature and Date in Handwritten)

Vision Statement of the Department.

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission Statement of the Department.

To nurture computer engineering professionals by offering Dynamic learning environment that encourages problem-solving using emerging technology, National Education Policy aligned evidence-based technical education, fostering ,innovation, research, and industry–institute collaboration & Holistic, ethical and sustainable development for lifelong success.

Session	2024-25 (ODD)	Course Name	Web Technology Lab
----------------	----------------------	--------------------	---------------------------

**Department of Computer Technology**

Semester	3	Course Code	23CT1301
Roll No	08	Name of Student	Dipali narayan bhute
Practical Number	06		
Course Outcome	1. Understand various internet technologies. 2. Design the web pages using HTML and CSS. 3. Implement the XML technology to store the data. 4. Develop the interactive web pages using JavaScript.		
Aim	JavaScript — Arrays, Objects & Higher-Order Functions.		
Problem Definition	Develop a JavaScript program to model a shopping cart using an array of product objects. Each product should contain id, name, price, and quantity.		
Theory (100 words)	An array is a collection of multiple values stored in a single variable. In JavaScript, an array can contain numbers, strings, objects, or other arrays. An object stores data in the form of key-value pairs.		
Procedure and Execution (100 Words)	Step for Implementation: Create a new HTML file named index.html. 1. Create a CSS file named style.css for designing the shopping cart. 2. Create a JavaScript file named script.js. 3. Create an array named cart containing product objects. 4. Each product object contains id, name, price, and quantity. 5. Create the addToCart() function to add a new product using push(). 6. Create the removeItem() function to remove a product using filter(). 7. Create the getProductNames() function to extract product names using map(). 8. Create the calculateTotal() function to calculate the total cart price using reduce(). 9. Display the products, product names, and total price on the webpage. 10. Add a new product, Headphones, to the cart. 11. Remove the Mouse product from the cart. 12. Execute the program in a web browser. 13. Observe the final shopping cart and total price.		

Department of Computer Technology

Code:

Vision Statement of the Department.

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission Statement of the Department.

To nurture computer engineering professionals by offering Dynamic learning environment that encourages problem-solving using emerging technology, National Education Policy aligned evidence-based technical education, fostering ,innovation, research, and industry–institute collaboration & Holistic, ethical and sustainable development for lifelong success.

	Output:
Output Analysis	The program successfully demonstrates the use of JavaScript arrays and objects to represent a shopping cart.the cart array stores multiple product objects. The push() method adds a new product to the cart.
Link of student Github profile where lab assignment has been uploaded	
Conclusion	The JavaScript shopping cart program was successfully implemented using arrays, objects, push(), filter(), map(), reduce(), arrow functions, and higher-order functions. The program successfully added and removed products, displayed product names, and calculated the total cart price
